

**Sources**

- (1) NHS SMS Validated Physical Assault Statistics 2009/10  
 (2) Physical assaults at (1) that were declared as involving medical factors (see notes below)  
 (3) DH Workforce Statistics 2009 (published 30th September 2009)  
 (4) Assaults per 1,000 staff (calculation based on DH figure)  
 (5) Health body declaration of total staff (as at 31st March 2010)  
 (6) Assaults per 1,000 staff (calculation based on health body declared figure)  
 (7) Health body declaration of total criminal sanctions applied during the period 1st April 2009 to 31st March 2010

**Notes**

Physical assault statistics (source 1) are validated by the NHS SMS. All other data sets are the responsibility of DH (source 3) or the individual health body (sources 5 and 7). DH staff figures were published at September 2009 and health body figures were provided at March 2010. Both have been listed as there is some variance.

Source 2 is the number of physical assaults that were attributed to the medical illness, mental ill health, severe learning disability of the assailant, or treatment administered to the assailant. This figure has been calculated by applying the percentage of total declared assaults identified as having medical factors, to the validated total assault figure at source 1.

Data rounding may mean some figures appear to be incorrect. The results are held exactly and rounded for display.

**IMPORTANT** - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture.

Many health bodies have undergone reconfiguration during 2009/10 in line with DH Transforming Community Services guidelines. This has predominantly affected the PCT sector, but in some instances health bodies in the mental health and acute sectors have also been affected. Wherever possible the figures for these health bodies have been published under their legal entity. In some cases figures for these health bodies may appear skewed due to the timing and the way in which they have reconfigured.

**Sources**

- (1) NHS SMS Validated Physical Assault Statistics 2009/10
- (2) Physical assaults at (1) that were declared as involving medical factors (see notes below)
- (3) DH Workforce Statistics 2009 (published 30th September 2009)
- (4) Assaults per 1,000 staff (calculation based on DH figure)
- (5) Health body declaration of total staff (as at 31st March 2010)
- (6) Assaults per 1,000 staff (calculation based on health body declared figure)
- (7) Health body declaration of total criminal sanctions applied during the period 1st April 2009 to 31st March 2010

**Notes**

"-" indicates figure not declared or 'not known' by the health body.

Physical assault statistics (source 1) are validated by the NHS SMS. All other data sets are the responsibility of DH (source 3) or the individual health body (sources 5 and 7). DH staff figures were published at September 2009 and health body figures were provided at March 2010. Both have been listed as there is some variance. Source 2 is the number of physical assaults that were attributed to the medical illness, mental ill health, severe learning disability of the assailant, or treatment administered to the assailant. This figure has been calculated by applying the percentage of total declared assaults identified as having medical factors, to the validated total assault figure at source 1.

Data rounding may mean some figures appear to be incorrect. The results are held exactly and rounded for display.

**IMPORTANT** - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture. In some instances, provision of elderly care services in the acute sector may contribute towards high assault figures.

Many health bodies have undergone reconfiguration during 2009/10 in line with DH Transforming Community Services guidelines. This has predominantly affected the PCT sector, but in some instances health bodies in the mental health and acute sectors have also been affected. Wherever possible the figures for these health bodies have been published under their legal entity. In some cases figures for these health bodies may appear skewed due to the timing and the way in which they have reconfigured.

- (2) Physical assaults at (1) that were declared as involving medical factors (see notes below)
- (3) DH Workforce Statistics 2009 (published 30th September 2009)
- (4) Assaults per 1,000 staff (calculation based on DH figure)
- (5) Health body declaration of total staff (as at 31st March 2010)
- (6) Assaults per 1,000 staff (calculation based on health body declared figure)
- (7) Health body declaration of total criminal sanctions applied during the period 1st April 2009 to 31st March 2010

**Notes**

"-" indicates figure not declared or 'not known' by the health body.

Physical assault statistics (source 1) are validated by the NHS SMS. All other data sets are the responsibility of DH (source 3) or the individual health body (sources 5 and 7). DH staff figures were published at September 2009 and health body figures were provided at March 2010. Both have been listed as there is some variance. Source 2 is the number of physical assaults that were attributed to the medical illness, mental ill health, severe learning disability of the assailant, or treatment administered to the assailant. This figure has been calculated by applying the percentage of total declared assaults identified as having medical factors, to the validated total assault figure at source 1.

Data rounding may mean some figures appear to be incorrect. The results are held exactly and rounded for display.

**IMPORTANT** - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture.

**Notes**

"-" indicates figure not declared or 'not known' by the health body.

Physical assault statistics (source 1) are validated by the NHS SMS. All other data sets are the responsibility of DH (source 3) or the individual health body (sources 5 and 7). DH staff figures were published at September 2009 and health body figures were provided at March 2010. Both have been listed as there is some variance.

Source 2 is the number of physical assaults that were attributed to the medical illness, mental ill health, severe learning disability of the assailant, or treatment administered to the assailant. This figure has been calculated by applying the percentage of total declared assaults identified as having medical factors, to the validated total assault figure at source 1.

Data rounding may mean some figures appear to be incorrect. The results are held exactly and rounded for display.

**IMPORTANT** - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture. Health bodies have been categorised under the Mental Health sector where mental health and/or learning disability services constitute a significant proportion of their overall service provision.

Many health bodies have undergone reconfiguration during 2009/10 in line with DH Transforming Community Services guidelines. This has predominantly affected the PCT sector, but in some instances health bodies in the mental health and acute sectors have also been affected. Wherever possible the figures for these health bodies have been published under their legal entity. In some cases figures for these health bodies may appear skewed due to the timing and the way in which they have reconfigured.

- (5) Health body declaration of total staff (as at 31st March 2010)
- (6) Assaults per 1,000 staff (calculation based on health body declared figure)
- (7) Health body declaration of total criminal sanctions applied during the period 1st April 2009 to 31st March 2010

**Notes**

"-" indicates figure not declared or 'not known' by the health body.

Physical assault statistics (source 1) are validated by the NHS SMS. All other data sets are the responsibility of DH (source 3) or the individual health body (sources 5 and 7). DH staff figures were published at September 2009 and health body figures were provided at March 2010. Both have been listed as there is some variance.

Source 2 is the number of physical assaults that were attributed to the medical illness, mental ill health, severe learning disability of the assailant, or treatment administered to the assailant. This figure has been calculated by applying the percentage of total declared assaults identified as having medical factors, to the validated total assault figure at source 1.

Data rounding may mean some figures appear to be incorrect. The results are held exactly and rounded for display.

**IMPORTANT** - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture.

In some instances, provision of community hospitals, elderly care or learning disability services in the PCT sector may contribute towards high assault figures.

Many health bodies have undergone reconfiguration during 2009/10 in line with DH Transforming Community Services guidelines. This has predominantly affected the PCT sector, but in some instances health bodies in the mental health and acute sectors have also been affected. Wherever possible the figures for these health bodies have been published under their legal entity. In some cases figures for these health bodies may appear skewed due to the timing and the way in which they have reconfigured.
