

**Tables showing the number of reported physical assaults on NHS staff in 2012/13
National Summary by Sector Type**

Protect

Sources

- (1) NHS Protect Physical Assault Statistics 2012/13
- (2) Physical assaults at (1) that involved medical factors (see notes below)
- (3) Physical assaults at (1) that did not involve medical factors
- (4) NHS Workforce figures 2012 (Medical + Non-Medical) (Published by The Health and Social Care Information Centre (HSCIC))
- (5) Assaults per 1,000 staff (calculation based on (4))
- (6) Health body declaration of total staff (as at 31st March 2013)
- (7) Assaults per 1,000 staff (calculation based on (6))
- (8) Health body declaration of total criminal sanctions applied during the period 1st April 2012 to 31st March 2013

Notes

Physical assault statistics (1) are validated by NHS Protect. All other data sets are the responsibility of The Health and Social Care Information Centre (HSCIC) (4) or the individual health bodies (6) and (8). NHS Workforce figures were published by The Health and Social Care Information Centre (HSCIC) and relate to September 2012. The health body figures were provided as at 31st March 2013. Both have been listed as there is some variance. Source (2) are the number of physical assaults where the perpetrator did not know what they were doing, or did not know what they were doing was wrong due to medical illness, mental ill health, severe learning disability or treatment administered. These figures have been calculated by applying the percentage of total declared assaults identified as involving medical factors, to the validated total assault figure at (1).

IMPORTANT - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e. rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture.

With the abolition of PCTs on 1st April 2013 a number of primary & community care organisations did not submit their data for 2012/13. As such the primary & community care sector data is incomplete, unvalidated and excluded from the National Summary. Declared figures for Primary and Community Care organisations who submitted figures are included in the appendix.

A list of organisations that have undergone **midyear** restructure, the date this occurred and an explanation of how this change has been handled in the data shown, can be found at the end of this page*

NHS Protect

Tables showing the number of reported physical assaults on NHS staff in 2012/13, broken down by health body

Acute Sector

Sources

- (1) NHS Protect Physical Assault Statistics 2012/13
- (2) Physical assaults at (1) that involved medical factors (see notes below)
- (3) Physical assaults at (1) that did not involve medical factors
- (4) NHS Workforce figures 2012 (Medical + Non-Medical) (Published by The Health and Social Care Information Centre (HSCIC))
- (5) Assaults per 1,000 staff (calculation based on (4))
- (6) Health body declaration of total staff (as at 31st March 2013)
- (7) Assaults per 1,000 staff (calculation based on (6))
- (8) Health body declaration of total criminal sanctions applied during the period 1st April 2012 to 31st March 2013

Notes

Physical assault statistics (1) are validated by NHS Protect. All other data sets are the responsibility of The Health and Social Care Information Centre (HSCIC) (4) or the individual health bodies (6) and (8). NHS Workforce figures were published by The Health and Social Care Information Centre (HSCIC) and relate to September 2012. The health body figures were provided as at 31st March 2013. Both have been listed as there is some variance.

Source (2) are the number of physical assaults where the perpetrator did not know what they were doing, or did not know what they were doing was wrong due to medical illness, mental ill health, severe learning disability or treatment administered. These figures have been calculated by applying the percentage of total declared assaults identified as involving medical factors, to the validated total assault figure at (1).

IMPORTANT - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e. rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture.

A list of organisations that have undergone **midyear** restructure, the date this occurred and an explanation of how this change has been handled in the data shown, can be found at the end of the first page of this document*

- (3) Physical assaults at (1) that did not involve medical factors
- (4) NHS Workforce figures 2012 (Medical + Non-Medical) (Published by The Health and Social Care Information Centre (HSCIC))
- (5) Assaults per 1,000 staff (calculation based on (4))
- (6) Health body declaration of total staff (as at 31st March 2013)
- (7) Assaults per 1,000 staff (calculation based on (6))
- (8) Health body declaration of total criminal sanctions applied during the period 1st April 2012 to 31st March 2013

Notes

Physical assault statistics (1) are validated by NHS Protect. All other data sets are the responsibility of The Health and Social Care Information Centre (HSCIC) (4) or the individual health bodies (6) and (8). NHS Workforce figures were published by The Health and Social Care Information Centre (HSCIC) and relate to September 2012. The health body figures were provided as at 31st March 2013. Both have been listed as there is some variance.

Source (2) are the number of physical assaults where the perpetrator did not know what they were doing, or did not know what they were doing was wrong due to medical illness, mental ill health, severe learning disability or treatment administered. These figures have been calculated by applying the percentage of total declared assaults identified as involving medical factors, to the validated total assault figure at (1).

IMPORTANT - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e. rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture.

NHS Protect

Tables showing the number of reported physical assaults on NHS staff in 2012/13, broken down by health body Primary and Community Care Sector Appendix

Sources

- (1) NHS Protect Physical Assault Statistics 2012/13
- (2) Physical assaults at (1) that involved medical factors (see notes below)
- (3) Physical assaults at (1) that did not involve medical factors
- (4) NHS Workforce figures 2012 (Medical + Non-Medical) (Published by The Health and Social Care Information Centre (HSCIC))
- (5) Assaults per 1,000 staff (calculation based on (4))
- (6) Health body declaration of total staff (as at 31st March 2013)
- (7) Assaults per 1,000 staff (calculation based on (6))
- (8) Health body declaration of total criminal sanctions applied during the period 1st April 2012 to 31st March 2013

Notes

Physical assault statistics (1) are validated by NHS Protect. All other data sets are the responsibility of The Health and Social Care Information Centre (HSCIC) (4) or the individual health bodies (6) and (8). NHS Workforce figures were published by The Health and Social Care Information Centre (HSCIC) and relate to September 2012. The health body figures were provided as at 31st March 2013. Both have been listed as there is some variance. Source (2) are the number of physical assaults where the perpetrator did not know what they were doing, or did not know what they were doing was wrong due to medical illness, mental ill health, severe learning disability or treatment administered. These figures have been calculated by applying the percentage of total declared assaults identified as involving medical factors, to the validated total assault figure at (1).

IMPORTANT - care should be taken when comparing assault figures as there are many factors which may influence a health body's published figures including: a) population served b) geographical setting (i.e. rural/urban), c) level of provision of mental health, learning disability and elderly care services, d) changes in service provision, e) health body amalgamations and splits f) embedding of reporting culture.

With the abolition of PCTs on 1st April 2013 a number of primary care organisations did not submit their data for 2012/13. As such the primary and community care sector data is incomplete. It was therefore not possible to validate the data, thus all figures stated are those as declared by the health bodies.

A list of organisations that have undergone **midyear** restructure, the date this occurred and an explanation of how this change has been handled in the data shown, can be found at the end of the first page of this document*
