# IN THESE TIMES OF UNCERTAINTY, YOU NEED A SECURITY PARTNER YOU CAN TRUST

## WE ARE **HERE TO HELP!**

SGC Security Services is a market leader within the private security industry. Offering advice, support and partnership to our clients for many years, now more than ever our expertise is being called upon to protect People, Property and Assets. Right at the core of our business is our people right from Guidance and Management of Paul Macarthur our Managing Director through our Operations team to our Officers on the ground we all have the same desire ..... protect our Clients Property, People and Assets.

Many of our clients old and new are finding the need for Security Services ever increasing and find they require Security due to restrictions placed upon them by their Insurance Companies. These restrictions are now even greater as the current situation may be leaving clients People, Property and Assets exposed to what may be an increased threat due to crime increasing.

We can offer the following giving you piece of mind that you have done everything that is practicably possible to protect your People, Property and Assets and thus mitigating any exposure when trying to claim on your insurance

- > Manned Guarding
- > Key Holding
- > Alarm Response
- > Remote CCTV Monitoring
- > Mobile Patrols
- > Void and Vacant Property Protection

## OUR MISSION

*“To provide our clients with an inspired level of service that delivers excellence as standard.*

*We will achieve this with an unquenchable thirst to deliver a world class service envied by our competitors”*

From our start in 2006 we continually strive to provide the very best to our clients.

We have built a strong reputation in the security industry both within the UK and internationally in providing a range of reliable, bespoke and evolving security services; whether you are a large or small organisation we know we can fulfil any security requirement you may have. Drawing on our abundant level of expertise we are able to successfully manage and deliver contracts focusing on both security and safety which adheres to local, national and international standards and regulations.

Everything we do is designed to deliver excellence as standard.

# OUR ABILITY TO DELIVER

In line with our SIA Approved Contractor Status (ACS) SGC security services complies fully with British Standard in static guarding, mobile patrols, key holding, door supervision and close protection. We are able to provide these services 24 hours a day 7 days a week across the UK.

Safety also comes first with SGC security services, so when it comes to the welfare of our customers and own employees, we leave nothing to chance. Consequently, we have been awarded the 'Safe Contractor' accreditation with regard to our Health & Safety Management Systems.

# OUR INNOVATION

We are always adapting our way of working to implement new security technologies, security systems and security solutions so that we are able to offer the most up-to-date technology and planning to your contract or project.

Our software provides our clients with real-time verification of activity and reports, ensuring that our teams have all the resources needed to achieve their responsibilities.

Our cloud based technology is user friendly, flexible and scale-able which is available to you anytime and anywhere.

- > Vehicle Inventory Management
- > Employee Safety Features

# OUR SERVICES

We are able to provide these services 24 hours a day, 7 days a week across the UK.

## Manned Guarding Services

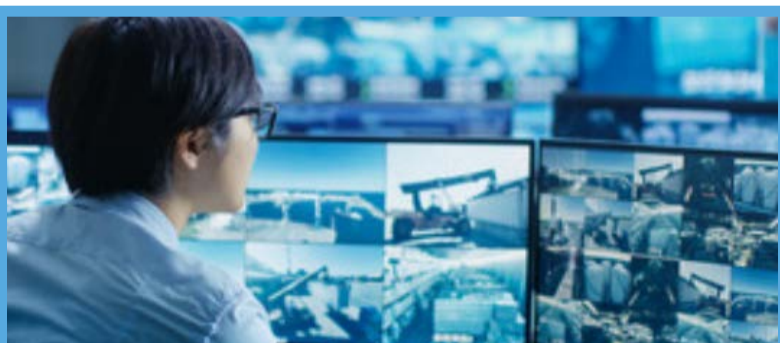

When it comes to security, manpower should never be underestimated, which is why manned security guarding is still one of the main preventative measures to ensure the protection of your premise and personnel. Our Security Officers offer much more than a simple security presence and the odd patrol of your building by taking a proactive and professional approach.

We have been providing emergency guarding solutions to Commercial Buildings, Retail Outlets, Construction Sites, Public Health Care Facilities and Government buildings for over a decade.

## Car Park Management

We offer a wealth of experience in managing both static and green field sites and a complete service combining planning consultancy and operation through to final debrief management and reporting. We can offer planning consultancy, event operation through to being able to deploy appropriately trained and accredited traffic marshals on the public highway to direct traffic.

## 24/7 Control Centre

Random or scheduled mobile security patrols are an effective alternative to manned security guards. This security Our Security Operations Centre is at the heart of our operational model providing our clients intelligence and crisis communication tools enabling them to mitigate risk and make better business decisions. Staffed 24/7, by a team of highly skilled operators. We also provide on and off-site CCTV monitoring services for the corporate, commercial, industrial and residential sectors.

Using state-of-the-art equipment our dedicated, fully trained response officers will promptly and professionally attend an alarm activation. We will investigate all call outs within 60 minutes, we will then alert the appropriate emergency services or we may be instructed to take remedial action to secure the premises until the next working day.

# OUR SERVICES

## Key Holding Services

Allowing a third-party contractor to take responsibility for the keys to your premises is not an easy decision and nor should it be. Therefore, we conform to BS 7984:2016 for key holding and mobile response security services. How does our Key Holding and Alarm Response Service work?

Your keys are stored in accordance with the BS 7984 for Key Holding Services

## Void & Vacant Properties

In the current economic climate, with an ever-increasing number of commercial and residential properties left standing empty, with the increase of vandalism and squatting, the security of a void property is more important than ever.

Our void property security services will help you comply with your duty of care and building insurance requirements, as well as reducing the risk of theft, squatting, and vandalism. We can also install state-of-the-art temporary alarm systems linked directly to our 24-hour security control centre.

## Mobile Patrol Services

Random or scheduled mobile security patrols are an effective alternative to manned security guards. This security service is not only a cost-effective solution, but an excellent visual deterrent against crime through our real time patrol management system.

- > Fully Uniformed Guards and Marked Patrols Vehicles
- > Internal Patrols
- > Full Site Management
- > Cash Collection
- > Quick Response to Incidents
- > Interim and Extensive Incident
- > Ability to Cover Vast/Unsafe Areas
- > Asset Transfers

We can also offer internal mobile patrols, where the mobile security supervisor will enter your premises to patrol your building and complete routine maintenance checks. This will ensure all fixtures including, windows and doors are locked to protect the building from crime and unwanted entry for your complete peace of mind.

# TEMPORARY CCTV SOLUTIONS

SGC Security Services SiteWatch CCTV Systems are ideal for construction sites, Void Properties and Scaffolding structures. Providing a highly effective and flexible alternative to traditional Manned Guarding, this solution saves clients on average 70% compared to security guarding!

SGC Security Services have vast experience and understanding of the Construction Industry and advise clients on appropriate measures to help mitigate any potential Security breaches by strategically positioning and designing each construction site CCTV System to the exact requirements of the site, covering all vulnerable areas like Plant Hire, Compounds and Fuel Tanks.

SGC Security Services Site Watch wireless CCTV system is our most popular security solution with our Construction sector clients. This system has been proven to be extremely cost effective, reliable and flexible! The wireless camera system is available to rent nationally for a low weekly fee and is ideal for short or long term projects with little or no on-site facilities. The camera is completely self-sufficient and is powered by specialised batteries which last up to 4 Years per unit\*. The PIR motion sensor and integrated Video camera is equipped with infrared illuminates to enhance night vision and is designed to detect an intruder, instantaneously record a short video clip which is transmitted back to our 24 Hour National Control Centre and a Response unit or the emergency services are deployed. These systems offer cost savings of up to 70% compared to traditional Manned Guarding services, can be used as a Fire Protection system for wooden frame developments, and are monitored 24/7!

Our Tripwire CCTV system provides our clients with a more sophisticated type of site protection using the latest Video Analytics Technology. Working closely with our Construction sector clients, our engineers review each site individually working with the site team installing the Site Watch system to the exact requirements of the site and strategically fitting the CCTV cameras in vulnerable areas. Our engineers then create "ZONES" in and around the site at specific areas using Virtual Trip lines. When this specific area is breached, the system sends an alarm activation and site footage back to our 24 Hour National Control Centre alerting our monitoring staff of an intrusion on site. A response unit or the emergency services will be deployed to site to investigate the activation and a full detailed report will be sent to the client explaining the incident.

# SECURITY CONSULTANCY

Once the security systems for the contract are in place, we create a streamlined and detailed plan for each individual member of the security team. Key personnel are involved in the planning from the inception and information is disseminated through our supervisors and senior management team; this ensures that the transfer of information from the planning stages to the execution is smooth and comprehensive.

Throughout the project we manage the security operation and if changes to pre-existing plans are required we facilitate this process through the established security management structure.

SGC Security Services offers in depth practical and theoretical knowledge and experience of High Risk Projects such as Construction Sites, Commercial Buildings, Retail Outlets, Public Health Care Facilities and Government buildings for over a decade.
